

NIKL Dialogue Corpus 2025

(Version 1.0)

- **Data name:** NIKL Dialogue Corpus 2025
- **Release date**
 - (Version 1.0) 2026. 6. 30.
- **Data type:** text
- **Related Project:** Collecting and refining dialogue corpus 2025
- **Data Description:**
 - ※ For more detailed information, refer to the National Institute of Korean Language website
 > Resources > Research & Survey Materials > ‘Collecting and refining dialog corpus 2025’
- **Content**
 - Dialog corpus is composed of transcribed daily dialogue on 10 topics. It includes dialogues with a minimum of two and a maximum of four speakers, with an average duration of 12 to 18 minutes, and amounts to approximately 550 hours of content.
 - The public monologue is a corpus constructed by transcribing monologue, where the speaker engages in discourse without dialogue or verbal interaction with multiple parties. It comprises 12 topics and amounts to approximately 100 hours of content.

	Number of Speakers (Unit: People)	Construction Time (Unit: Hours)
Dialogue	1,706	553.3
Monologue	152	101.5
Total	1,858	654.8

- The daily dialogue were transcribed into Korean, and were transcribed using a combination of verbatim (transcribed as it is actually pronounced, such as when speakers deviate from the standard pronunciation or there are multiple standard pronunciations) and non-verbatim (transcribed according to Korean spelling and standard language rules) methods.
- The basic unit of speech segmentation and transcription is the sentence.

· Content and size

- Total of 2,288 daily dialogue (10 topics), Total of 639 monologue(12 topics)

Category		Case	Category		Case
Topic of dialogue	Health	269	Topic of monologue	Beauty, fashion	28

• JSON Structure

Field	Type	Description
id	str	* corpus ID
metadata	obj	* meta data of corpus
title	str	* file title
creator	str	* creator
distributor	str	* distributor
year	str	* year of construction
category	str	* category
annotation_level	arr[str]	* annotation level
sampling	str	* sampling method
document	arr[obj]	* main data of corpus
id	str	* article ID
metadata	obj	* newspaper article meta information
title	str	* article title
author	str	* author
publisher	str	* publisher
date	str	* date of recording
topic	str	* dialogue topic
speaker	arr[obj]	* speaker information
id	str	* speaker ID
age	str	* age
occupation	str	* occupation
sex	str	* sex
birthplace	str	* birthplace
principal_residence	str	* principal residence
current_residence	str	* current residence
education	str	* academic ability
setting	obj	* information
relation	str	* relationship between speakers
contact_frequency	str	* The frequency of dialogue indicates the level of closeness between individuals.
utterance	arr[obj]	* speaker information
id	str	* utterance ID
form	str	* non-verbatim transcription
original_form	str	* verbatim transcription
speaker_id	str	* speaker ID
start	num	* start time of the utterance
end	num	* end time of the utterance
note	str	* transcriber's notes
